Price POA

Material: steel, stainless steel or aluminum.

Technical Description: Natanti acts to ' **opening of waterways** in swampy areas by means of an **excavator arm** . They have a **central container** , which can be hinged on one side, on which is loaded the dredged material to be discharged onto the ground with operation yield security thanks to **standing places stabilizers aft** . Where required, the container can act as a **compactor** , or, thanks to a particular mechanism, **squeezes the wet algae** for compacts and reduce clutter.

They can be propelled with **screw propellers** with antialghe system or with paddle wheels.
The **draft** can be as little as **30-35 cm** .

Considering the hull distance from the edge to the collection point reached by the arm, the dredger can also operate on the shores

There are built in series, therefore it is possible to choose with the client the possible combinations of cutting, collection, storage, unloading, size, etc.
