**Price** POA

**Material:** steel, stainless steel or aluminum.

**Technical Description:** They are designed for **cleaning the bottom of the nurseries** , for the **collection** , the **storage** and **selection** of **clams** .

It 'a hull with flat bottom having installed at **the bow a belt conveyor** equipped with a particular device (patented) for the removal of the bottom and on the central bridge, approximately 35 square meters, it is possible to install the equipment ( **screens, pumps, selectors clams, etc** ).

Vessels of this type are provided in almost all the **Venetian lagoon** and several consortia **of Chioggia Fishermen, Goro and surroundings** . Thanks to sophisticated machinery installed on board, the clams are unloaded from vessels already **packaged** , ready for purging in the sheds. The innovation of these vessels has greatly facilitated the work of the fishermen that before the introduction of this vessel, in the 90s, everything was done by hand.

The cutting equipment solutions can be decided with the customer.

The **Province of Ferrara** has done a study on innovation introduced by our boats of sowing and fishing techniques of clams and published the results in a book.

They were also often objects of interviews with fishermen, owners of our boats, from TV shows such as **Ocean Planet**.

The details of all vessels are offered in good faith but we cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. Any buyer should instruct their agents, or their surveyors, to investigate such details as the buyer desires validated. This vessel is offered subject to sale, price change, location or withdrawal without notice.
