This is a semi-asymmetrical, foil assisted catamaran designed to offer economical cruising speeds of 24 -26 knots with twin 300hp outboards with up to 24 passengers on board.

Designed by Noah Thompson (NZ), the boat is available in a variety of layouts to better address the needs of dive and tour operators. Foil-assistance permits a higher level of comfort and lower fuel consumption.

The NXT 35 SP is slightly bigger than the 35 DC but has similar characteristics : seaworthy hull, huge cockpit area, economy of operation and maintenance free construction.

This powercat workboat is ideal for small resort owners, passenger runs, dive operations, and surf charters. With several units already delivered and in service in various parts of the world, the NXT 35 SP is characterized by excellent performance and good load carrying capacity.

She is ideally suited for the Mediterranean or tropical climates with open or enclosed sides, drop down clear screens and a layout fully customizable.

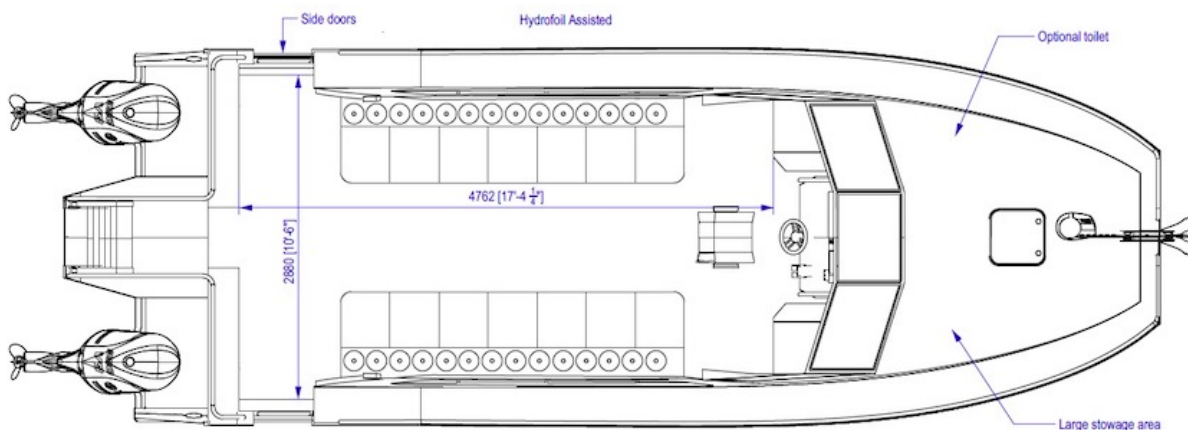

The main characteristics of this powerful and compact commercial catamaran are :

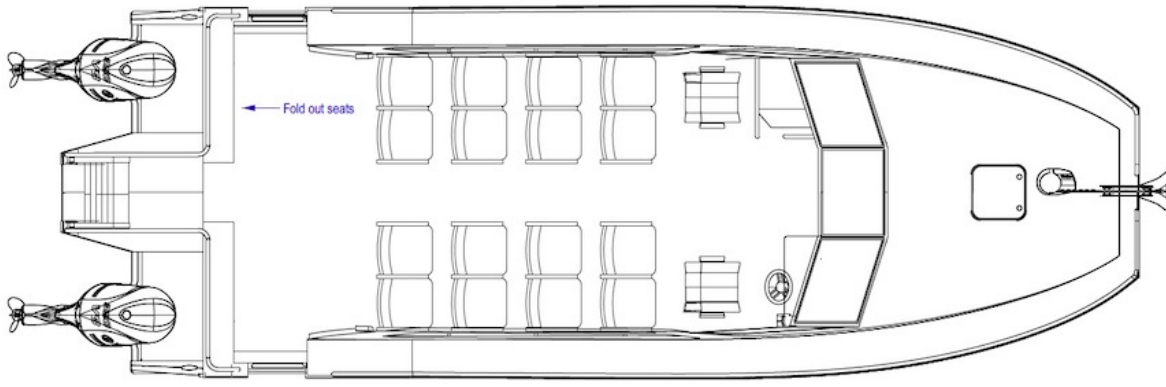

- Total length 10.9m
- Very strong aluminum construction
- Outboard (gas or diesel) twin 300 hp and up.
- Speed 35+ knots
- 16 to 24 pax capacity

The catamaran is available in a variety of configurations and can be customized to meet an operator's exact requirements. The hull is standard but the cockpit layout can be easily modified and is basically designed in cooperation with the operator.

Options include :

- Toilet
- Side doors
- Luggage room
- Small crew cabin with one double berth
- Dive ladder
- Surfboard rack
