The Scavenger HYD22 Weed Harvester is the latest dual purpose river maintenance boats designed by FiveAB Group. This boat can be used for collecting floating rubbish via the conveyor belts directly into the boat. It can also be used to cut underwater weeds up to 1.2m depth and the weeds will be collected immediately via the conveyor and into the boat for disposal.

The unique twin propeller propulsion system will give you extremely good manoeuvrability in tight situation and can even rotate the vessel on the spot.
