General Description

This new model by Compositi Veloci boatyard is characterized by a strong construction and a very practical layout.

Designed to fit inside standard 40' containers this house boat can be easily shipped anywhere in the world at very reasonable costs.

The house boat has a living area of about 26 square meters divided into four rooms: double bedroom, toilet with shower, a well equipped kitchen (two burners, sink and fridge) and a living room. Both bedroom and living room have a glass wall that can be opened towards a veranda overlooking the water.

A comfortable staircase leads to a large panoramic sundeck capable of accommodating up to 8 people.

The house is strongly insulated and air conditioned with a heat pump.

The hulls of the pontoon below have a cubic capacity of 15 cubic meters and house fresh water tanks, boilers and biological waste water purifier.

The high volume hulls can accommodate batteries powered by solar panels, generator and any other optional accessory.

The house boat is shipped disassembled and can easily be assembled on site, complete with electrical and hydraulic systems. Assembly time is 4 days.
