15m Research Vessel For Charter

Listing ID - 4287

Description Hawere - 15m Research Vessel

Date 2002

Launched

Length 15m (49ft 2in)

Beam 4.5m (14ft 9in)

Draft 1.2m (3ft 11in)

Location Auckland, New Zealand

Broker Geoff Fraser
geoff.fraser@seaboats.net
+64 21 61 222 5

Power: 2 x 420hp
Cruise: 18 knots (full load)
Sprint: 27 knots (light load)
Range: 375 nautical miles

Berths overnight 6 persons
Day Trip Capacity 20 persons

Commissioned by the University of Auckland as a Research Vessel but Hawere's specification was driven by many different needs. The result is a relatively fast, multi-purpose workboat with large deck spaces, easy access to the water and accommodation facilities to service eight researchers and a professional skipper. The vessel currently conducts a diverse range of research work, is chartered to local government organisations and other research agencies to maximise utilisation and claw-back costs. The laboratory's operational requirements included everything from estuary surveys to extended dive trips to the exposed Three Kings Islands. The Kings are situated 30nm north west of Cape Reinga and are washed with strong currents and the changeable conditions in the area can produce vicious seas.

Hawere is also an excellent Dive Support Vessel.

Hawere provides for full operational deck, capable of dealing with the most difficult tasks.

OPERATION:

Powered by twin Caterpillar 3126 marine diesel engines developing 420 hp each and coupled to ZF 286A gearboxes, driving four blade propellers, which provide a service speed of 18 knots and maximum of 24 knots. Hydraulics power the main winch in the cockpit, a warping capstan that also services the overhead gantry, a pot hauler on the starboard side and the anchor windlass. Hydraulic backup is also provided by a 240v hydraulic pump powered by the 7.5kw genset. The back-up pump also drives the on-board dive compressor.

ACCOMMODATION:

Hawere provides very comfortable & practical accommodation, for researchers, divers or fishermen.

The accommodation area is open plan, with plenty of headroom and natural light provided by three overhead hatches and ten fixed hull ports. The vessel's toilet, shower and wet-lab facilities are located off the cockpit. The bridge seats six passengers plus the skipper and a pilot berth is provided in the port, aft corner.

Berths are in a bunk style with plenty of room and storage. A full stocked galley provides all the cooking features of any modern home. The Galley has a TV and video suite for relaxing in the evening or any pre-operational briefs. Guests can kick back and listen to the skipper's selection of great music.

Hawere - the perfect support vessel

CAPABILITY:

Equipped with a powerful winch capable of lifting 300Kg and a wide deck that provides an excellent platform for operations.

A dive compressor is onboard and used to assist diving operations. Nitrox gas can be provided on request. Ample storage for cylinders is provided as well.

To assist with in water activities, Hawere has an additional tender, 3.8m RIB fitted with a 30hp engine to provide capability for support operations.

There is also a dry room for researchers & photographers.

MARITIME SURVEY:

Hawere is in full survey and regularly maintained by leading marine specialists.

Her operational area extends from East Cape to North Cape, including the Three Kings Islands. Currently there is sleeping room for 6 overnight guests, soon to be increased. Day capacity is for 20 persons.

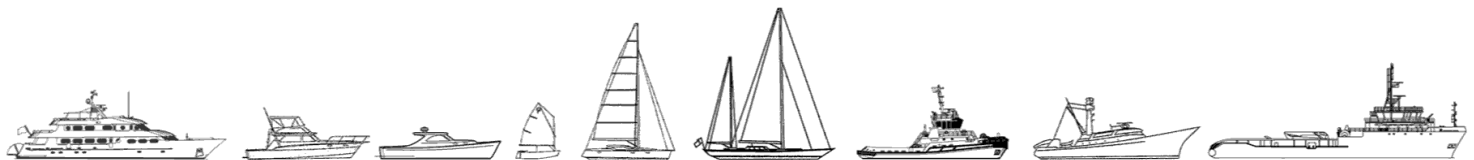

The details of all vessels are offered in good faith but we cannot guarantee or warrant the accuracy of this information nor warrant the condition of the vessel. Any buyer should instruct their agents, or their surveyors, to investigate such details as the buyer desires validated. This vessel is offered subject to sale, price change, location or withdrawal without notice.
