

Gene Wheeler

Security Systems Consultant

Gene has worked within the security and safety world since 1995 and has provided years of expert security consulting and systems integration design services throughout the globe. His specialties include threat assessment, physical security assessment, security technologies assessments which are documented in a full security and safety report.

Gene also consults to develop or amend policies and procedures, response plans and disaster recovery plans. With Gene's technical and engineering skills he has designed and delivered security and safety technologies to clients worldwide. A few of his clients include the United States Federal Reserve Banks; port authorities (Port of Oakland CA, Port of Connecticut, US Coast Guard facilities); airports around the world (Los Angeles International Airport, Philadelphia International Airport and Doha International Airport); and oil and energy companies globally (Chevron and Royal Dutch Shell). He has worked with nearly all levels of law enforcement including customs and immigration authorities.
