General Description

Established in 1996, Izmir Shipyard is a builder with a focus on small to medium size vessels of HDPE construction.

Stock designs include patrol boats, pilot boats, workboats, and utility crafts for commercial and public customers. Over 50 vessels have already been delivered and SeaBoats are proud to market them all over the world.

The shipyard has invested heavily on HDPE technology and can now deliver any of the stock boats in just a few weeks from order. Moreover, HDPE can offer a number of advantages: unsinkability, long life (no corrosion of any kind), shock absorbing, resistance to marine growth (no bottom painting required).

Sea VIZion Series is a family of small workboats, specifically designed to offer safety, functionality and durability even in extreme working conditions.

Common features include deep V hull shape for maximum stability, non-slip deck, double bottom hull and 5 watertight sections of tubes filled with polystyrene foam for safety.

They offer huge deck area, a lot of space and storage, elevated foredeck and push-up bow for functionality. Construction is UV resistant HDPE 100 sheets from Röchling®, state of art hand welding and structurally integrated all-around fenders for durability.

They are available in 3 sizes :
