Price POA

The 11m is available as both an asymmetric hull form and the Deep Vee planing hull form. The asymmetric has a fine forward section developing into a medium deadrise single chine form aft allowing the vessel to plane for high speed operations. Fitted with water jets it offers extremely shallow draft and excellent sea keeping characteristics.

The deep Vee used commonly for our general workboat application has a very fine entry which has the design optimised for low resistance, exceptional levels of performance, economy and comfort.

WFSV Asymmetric Hull 'Support 1'

LOA: 11 metres

Beam: 4.2 metres

Engines: Twin Yanmar 440hp

Speed: 34+ Knots (on water jets)

The asymmetric 11m hull is a high speed planning hull suitable for all workboat applications. With a draft of only 0.5m this vessel is very suited to shallow water. Support 1 has been working as a WFSV out of Grimsby transferring up to 12 technicians.

WFSV shafts and props 'Wildcat 1'

LOA: 11 metres

Beam: 4.96 metres

Engines: Twin Iveco 420hp

Speed: 25 Knots

Based on Blyth Workcats established and well-proven design this 11 metre crew transfer vessel was the first of three Blyth WFSV that the client bought. The vessel operates around the UK supporting windfarm survey, construction and maintenance activity.
